Supplemental Office Action

1. **Status:** The Claims 42-45, 54-64, were allowed per office action mailed on 06-26-2005. Further reviewing the allowed claims it was determined the dependent claims 55,57,59,61,63 to independent claims 42-45, 54 respectively do not add any new limitations to the independent claims listed above. The examiner amendments required, since the dependent claims limitation were added back to independent claims as examiner amendments to allow the application #09719523, the dependent claims 55,57,59,61,63 required to be deleted. Claims 42-45,54-64 are pending.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a personal interview with Raymond Diperna on July 1, 2005.

The application has been amended as follows:

In the Claims

The claims 55,57,59,61,63 are cancelled.

Allowable Subject Matter

3. Claims 42-45, 54,56,58,60,62,64 are allowed.

4. The following is an examiner's statement of reasons for allowance:

an image display apparatus comprising: a display panel for displaying an image by irradiation a fluorescent substance with electrons from an electron source to; an acceleration potential supply circuit for supplying to the display panel an acceleration potential for accelerating electrons from the electron source; a scanning circuit for supplying a scanning signal to the display panel; a modulation circuit for supplying a modulation signal to the display panel; and **a control circuit for stopping output from the scanning circuit and/or the modulation circuit to the display panel and a first power source for supplying power to the acceleration potential supply circuit and/or the scanning circuit and/or the modulation circuit and a second power source for supplying power to said scanning circuit and/or said modulation circuit upon an emergency state and a control circuit for stopping output from said supply of the acceleration potential to the scanning circuit and/or the modulation circuit at the initial stage after switching from said first to said second power source.**

The cited references on 892's fails to anticipate individually as well as render obviousness individually or in combination above bold underlined recited claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee.

Art Unit: 2673
